Objective

Motivated and detail-oriented Civil Engineering student seeking an entry-level opportunity to apply technical knowledge in construction and infrastructure projects. Eager to learn and contribute to real-world engineering solutions.

Education

- Dr Dy Patil institute of technology 2028 (Pursuing)
BE
First Year 8.32 , Second Year 8.31
- Central Board Of Secondary Education
10th
78.2% 2022
- Maharashtra State Board
12th
64.67% 2024

Skills

- **Civil / Drafting**
 - AutoCAD (Advanced)
 - Structural Drafting (Advanced)
 - Revit
 - Surveying
 - Drawing Interpretation
- **Design / Construction**
 - BIM (Intermediate)
 - Estimation (Intermediate)
 - Site Layout (Intermediate)
 - SketchUp (Intermediate)
- **Other Software**
 - MS Excel (Intermediate)
 - PowerPoint (Intermediate)
 - Python (Intermediate)

Certifications And Training

•AutoCAD (2D) – CESA Autodesk

- Completed AutoCAD (2D) certification and developed proficiency in accurate 2D engineering drawings.
- Prepared structural layouts and plans using industry-standard drafting, layer control and scaling practices.

Structural Drafting – CESA Autodesk

- Completed structural drafting certification covering beams, columns, slabs and footings.
- Practiced reinforcement detailing, structural plans, sections and layouts using AutoCAD.

Revit – Practical Training

- Hands-on experience in 3D architectural modelling using walls, floors, roofs, doors and windows.
- Practiced material assignment, component placement, structural plans, annotations and basic documentation.

BIM – Learning

- Learned BIM concepts, principles, project workflows, Revit-based modelling, coordination and model-based documentation.

Projects

• RCC Post Office Building – Planning & Drafting

- Prepared planning and detailing of a ground-floor RCC framed post office building.
- Developed architectural layout, section and elevation with functional zoning.
- Applied basic RCC concepts for column sizing, wall thickness and footing selection.
- Prepared drawings using AutoCAD.

Green Building & Sustainable Construction

- Applied green building principles, sustainable construction concepts and energy-efficient design approaches.
- Studied porous concrete for groundwater recharge and stormwater management, along with rainwater harvesting.
- Explored solar PV, solar water heating, natural ventilation, HVAC duct concepts and green roofs.

Urban Flood AI – Real-Time Urban Flood Nowcasting

- Developing an uncertainty-aware urban flood assessment and prediction framework.
- Integrating rainfall, elevation, drainage, land-use and road-network data for urban flood analysis.
- Using GIS, DEM and catchment analysis with 1D drainage modelling using EPA-SWMM.
- Exploring 2D surface-flow modelling and AI/ML for flood-depth, extent and onset-time prediction.

Rainwater Harvesting Field Survey – PCMC

- Selected to participate in a field survey of rainwater harvesting systems under Pimpri Chinchwad Municipal Corporation.
- Studied installation cost, operating condition, efficiency, maintenance and system ownership.
- Assessed functionality and effectiveness of systems for water conservation and groundwater recharge.

Achievements & Awards

- 2nd Runner-Up – SE PBL Competition (2026) for Green Building & Sustainable Construction Project.

Languages

- English
- Hindi
- Marathi

ONSITE & FIELD COMPETENCIES

- Construction drawing interpretation – plans, elevations and sections.
- Basic site safety awareness, PPE requirements and construction-site practices.
- Construction sequencing – knowledge of substructure and superstructure activities.
- Material testing awareness – concrete cube test, slump test and basic sieve analysis.
- Surveying & leveling – basic knowledge of surveying, leveling techniques and surveying instruments.
- Documentation and coordination – DPR preparation, site records and coordination with project teams.

Extracurricular Activities

• Srushti – Environmental & Social Awareness Club | Vice President

- Contribute to planning and coordination of environmental initiatives and student activities.
- Organize awareness events, competitions and sustainability-focused activities.
- Promote environmental conservation, water conservation and sustainable practices among students.

Antarang – Cultural Club | Active Member

- Served as Anchor and Co-Anchor for college events and contributed as an Event Manager.
- Worked with the Props Team on stage setup and event materials, developing teamwork and coordination skills.

Water Knowledge Center | Volunteer & Photographer

- Supported events and activities as a volunteer and photographer.
- Participated in a Cleanliness Drive on World Water Day and contributed to water-conservation awareness.

A handwritten signature in black ink, appearing to read 'Pawan Mate', with a stylized, cursive script.
